

BASHUNDHARA GROUP

For the People, for the Country

CHAIRMAN'S MESSAGE

Ahmed Akbar Sobhan
Chairman
Bashundhara Group

KEEPING FOCUS ON BUSINESS EXPANSION AND GROWTH IN THE MOST PROSPECTIVE SECTORS, THE GROUP IS CONTINUOUSLY TAKING UP NEW PROJECTS

First of all, let me shed some light on the background of the birth of Bashundhara Group. The Group's flagship entity – East West Property Development Limited – had come into being in 1987. The beginning was very modest, but the aim was very large and the vision was very wide. The Group was born with the aim and objective of serving the People and the Country, and with a vision of building Bangladesh as an economically developed and self-reliant country. These objective and vision have made Bashundhara Group keep widening its areas of business and thus turned it into one of the largest business and industrial conglomerates of the country by ensuring its strong presence in almost all major industrial and business sectors. The Group now boasts entities in sectors including real estate, cement, paper and allied products, liquefied petroleum gas, food and beverage, mass media, shipping, aviation, logistics, infrastructure development, and operation of shopping mall and convention center operation.

The Group has kept its march forward at a greater pace even in the present era of globalization and information technology, which have turned the entire world into a global village and invited cross-border competition.

We believe globalization has not only invited challenges, it has simultaneously opened up immense opportunities for any business entity. It has created inter-state trade dependence, furthered investment potentials and created scope of free-flow of information and industrial raw materials. Ensuring quality of goods and services and their price competitiveness can not only help them find good market locally, but also can take them beyond boundaries.

I would like to take the opportunity to share with you the experience of Bashundhara Group here. With meticulous planning, highest managerial efficiency and best use of its human resources, we have diversified our product range, ensured the best quality of our every product and service, and given the needs and requirements of the valued customers the topmost priority. All these have made every company of the Group a market leader in the respective sectors of its operation.

Keeping focus on business expansion and growth in the most prospective sectors, the Group is continuously taking up new projects to become the largest conglomerate distinctly.

The Group always upholds its aim, objective and vision and keeps up its endeavor for social and economic development of the country through fair business and corporate activities. It has contributed a lot to the overall development of the country and its economy as well as to the development of the local corporate culture.

As a custodian of Bashundhara Group, I would like to reiterate our commitment to the development of the country. I hope that the Group's cordial relations with all our valued customers and clients, as partners of prosperity, will be strengthened further in future. We also look forward to developing successful relations with our potential customers and clients. It will certainly help us grow and serve the stakeholders and the nation, even better in the days ahead.

LIFE AND WORKS |

AHMED AKBAR SOBHN IS A VISIONARY LEADER AND TREND-SETTER IN MANY INDUSTRIAL AND BUSINESS AREAS, INCLUDING REAL ESTATE, CONVERTED ENERGY AND MANUFACTURING.

Ahmed Akbar Sobhan, founder of the Bashundhara Group, a leading industrial and business conglomerate in the country, is not only an optimistic and courageous businessman but also a successful entrepreneur and visionary leader in the field of real estate.

He was and still is driven by his vision of building an economically empowered and self-reliant nation. He is an entrepreneur with the mission of creating innovative, committed and capable human resources what is grossly believed to have played key roles in his enormous success.

The core theme of this business group – ‘For the People, For the Country’ – is a glowing testimony to his commitment of doing much of his part for creating a better future of the nation.

Mr. Sobhan was born on February 15, 1952 in a noble Muslim family at Islampur in Dhaka, the then provincial capital of East Pakistan. He is the youngest son of Abdus Sobhan and Umme Kulsum. He did his graduation in Business Studies from the University of Dhaka.

He became a hockey player and entered business when his academic

attachment was over. He always had a vision of creating business organization of superior class. The enterprise he founded decades ago has ultimately become one of the largest business houses of the country.

With his ability of seeing far ahead, he first thought of developing modest accommodation for the middle and upper-middle income segments, the largest group of the society, and launched the East West Property Development (Private) Limited.

Firmly determined aim, absolute integrity, patience and untiring efforts were the secrets of his unobstructed success despite many adversities and hazards of different forms. The success has ultimately made him the father of the giant business house that is currently running more than 40 enterprises covering majority of the sectors.

Rapid growth in the real estate ventures encouraged him to take up newer industrial projects of domestic, regional and international needs. The projects deal with basic, paper and paper products, basic construction inputs such as cement, converted energy, liquid petroleum gas, petroleum refinery, large scale excavation and dredging, maritime transportation, food and beverage, mass media, aviation, heavy engineering, logistics services delivery, social gathering and convention facility development and so on. It has helped the nation cut the dependence on import to a large extent.

Diversification of business and far-sighted entrepreneurship helped the business group become the leader amongst the cutting-edge business

houses. The Group has employed a workforce of above 50 thousand people and thus supports livelihoods of half a million people behind the workforce.

Now, Sobhan finds himself as the proud father of four brilliant sons – Sadat Sobhan, Shafiat Sobhan, Sayem Sobhan and Safran Sobhan – who duly have excelled in their respective fields. All the four sons have been raised in a fashion that has made them able to shoulder their father's responsibilities quite admirably.

In recognition of his outstanding contributions to the country's housing sector, the President Gold Medal was conferred on him by the Government in 1994. He was also awarded the Kazi Nazrul Islam Medal in 1992 for significant roles in social development, the Janata Bank Prime Customer Award in 2002, the USA Summit International Award in 2002, which brought the business group international recognition, Bangladesh Cultural Foundation Award in 2009, Agrani Bank Best Client Award in 2010 and Mother Teresa International Canonization Award in 2016 for social welfare services in Bangladesh.

In spite of huge achievements, unbeaten successes, recognitions and felicitations from different spheres, Mr. Ahmed Akbar Sobhan remains as an accessible, humble and down-to-earth person, so that he can carry forward his missions and work for rebuilding a better future for the People and the Country.

MISSION, VISION & VALUES

MISSION, VISION

BUSINESS
EXPANSION AND
GROWTH IN THE
PROSPECTIVE
SECTORS

BASHUNDHARA GROUP DOES NOT WANT TO GROW ALONE; IT WISHES TO GROW TOGETHER WITH ITS PARTNERS, PATRONS, CUSTOMERS, EMPLOYEES AND OTHER STAKEHOLDERS.

Bashundhara Group believes in serving the People and the Country; not only in doing business and making profit. It had come into existence with that belief and adopted 'For the People, For the Country' as its core theme.

All the Bashundhara Group concerns always try to offer best possible services and products to customers for attaining their full satisfaction, as the Group endorses the notion that customers are the ultimate determining factor in success of any organization. It always strives to introduce new products and services to the customers.

Bashundhara Group believes that no organization can grow without an able and dedicated workforce behind it. It values and nurtures its officials, employees and other members of the staff accordingly. Through various acts and measures, the group tries to create a sense of belonging among the workforce so that they explore their full potential and give full dedication to the organization and get evaluated accordingly.

As a business conglomerate, Bashundhara Group does not want to grow alone; it wishes to grow together with its partners, patrons, customers, employees and other stakeholders.

The Group has reached out to many poor and underprivileged people through different philanthropic services and it wants to expand them across the country for the welfare of the people and development of the country.

Bashundhara Group has already become one of the largest conglomerates and the leader in many areas of business and industry in Bangladesh. It wishes to go far ahead from where it is now. The Group wants to be the largest business house of the country and the biggest contributor, from the private sector, to the economic and social development. It also wishes to bring more and more people under job and thus become the largest employer in the private sector.

To accomplish the vision, the group has already ventured into many business and industrial areas, including some as pioneer, and has plans to be engaged in many more areas. The group has started works for going global and hopes to announce its global presence in a couple of years.

Doing business is not an easy task anywhere, particularly in the fast-changing global scenario, which invites many new challenges. However, Bashundhara Group is confident of continuing its march forward even at a faster pace in any situation – favorable and unfavorable – in the days to come and always uphold its core theme – For the People, For the Country.

Bashundhara Group has adopted patriotism, honesty, fair practice and service to the nation as its core values, which act as the main basis in its decision-making. These values have created a moral compass for everyone at the group – from the top management to ordinary employees – and created the organizational culture accordingly.

The group always tries to be driven by these values and not to deviate from them in any situation.

East West Property Development (Pvt) Ltd.

BASHUNDHARA HOUSING – ULTIMATE DELIGHT IN LIVING

When ideal housing had become a rare opportunity in the urban areas, especially in the capital city, as a result of concrete crowd and unplanned erection of structures, the East West Property Development (Private) Limited, mother entity of the Bashundhara Group, came up with pragmatic solutions to the problem by offering most adorable accommodation facilities in the city back in late 80s.

Over the decades, the company has become successful in developing “a city within the city” where the dwellers’ needs are duly foreseen and addressed accordingly with best caring approach to the nature that has made the company pioneer in the real estate sector of this land apart from testifying the company’s slogan “For the People, For the Country”.

An extra-pleasant feeling is obvious to anyone coming across the canopies of flamboyant raintree, palms and myriads of known or unknown plants and trees at the company’s premier housing project well known as ‘Bashundhara’ which is located near the Baridhara Diplomatic Enclave.

Plentiful greenery in and around supported by adequate sunshine, fresh air and quietness, not free from birds’ tweets, of this housing project inspire peace of mind, health and positivity to the life as a whole. Living at Bashundhara is, therefore, synonymous with being in the total natural beauty while not missing the urban amenities.

Success stories of this mega-project have inspired the company to take up similar housing projects on the city outskirts like Savar, Keraniganj, Gazipur, South Keraniganj, Jhilmil area apart from extension of the flagship project – Bashundhara.

“Bashundhara Riverview Residential

Project” is the second largest project of the company developed at Hasnabad in Keraniganj, Dhaka. “Bashundhara Riverview Dakhina Residential Project” is the third largest project of the company at South Keraniganj and followed by the “Bashundhara Riverview Green Town Residential Project” on Dhaka-Mawa Highway at Keraniganj, Dhaka. “Bashundhara Mouchak Residential Project” has been developed near the national scout jamboree course at Gazipur, and “Bashundhara Savar Residential Project” at Bypile in Savar, Dhaka.

The flagship housing project of the company at Baridhara has also been extended by two more blocks called “P Block & Q Block”. Both the extended blocks are well connected by a moderately (100 feet) wide road and only a few minutes-drive from the Embassy of the United States of America at Madani Avenue, Baridhara.

Urban amenities at the Bashundhara Residential Project, Baridhara:

A number of hospitals of national and international repute – Apollo Hospitals Limited, National Healthcare Network Hospital and Bashundhara Eye Hospital – located inside the project are providing full-fledged and advanced health care services. Several always-open drug stores have been set up in the project area.

Several corporate houses and multinational companies – Walton, BDG and GrameenPhone – have already set up their head or corporate offices within the project area while many others are in the process of building corporate offices.

Elementary to post-graduation level education is available from educational institutions like International Schools Dhaka (ISD), Sunny Dale, Playpen English School, Hardco International School, Vigarunnisa Noon School, Korean School, Aga Khan Foundation, the North South University and the Independent University.

Majority of the mainstream private commercial banks and insurance companies have already set up their branches and automated teller machines (ATM) in the project area while several others are in the process.

Many outlets of reputed brands of consumer products are available at the vicinity of the housing project.

The entire housing project is always under security vigilance both physically by the company’s security force and electronically by strategically set closed-circuit cameras. It boasts easily-accessible utility services like electricity, gas, water, sewerage, trash disposal, cyber connectivity and cable-television and telephone.

The road network within the project areas is pragmatic and focused on the future demands. The narrowest road of this project is 25 feet while the widest is 100 feet. There are roads of different widths designed with far foreseen demand of the future residents.

Bashundhara Convention City is right there at the corner to host social gatherings, cultural and commercial events of any kind. Equipped with all modern amenities including security, the facility is easily accessible from all parts of the city.

Projects at a glance:

- Bashundhara Savar Residential Project, Bypile, Savar, Dhaka
- Bashundhara Uttarkhan Residential Project, Uttarkhan, Dhaka

Meghna Cement Mills Ltd.

Meghna Cement Mills Limited is the first industrial enterprise of the Bashundhara Group and the largest of its kind in the country. It was built on 9.83 acres of land inside the Industrial Zone of Mongla Port on the bank of the river Pashur in 1992 and started commercial production on January 15, 1996. It is producing nearly 0.78 million metric tons of Portland cement a year using high-quality raw materials procured mainly in Thailand, Oman, Japan, Korea and Vietnam.

High-quality raw material inputs, experienced workforce and modern technology-run machinery have guaranteed the quality of the finished products and eventually made it the best-selling cement brand in the country for many years.

The factory is well connected to all parts of the country by riverine modes of transportation and the road networks. It has two multipurpose jetties at the suitable proximities for easier and faster intakes of raw materials as well as supplying finished products out to the distribution points.

The company became a publicly traded entity with both the bourses of the country – Dhaka Stock Exchange and Chittagong Stock Exchange – in 1995 and 1996 respectively. Products of this industry are being put on sale under the registered trademark “KING BRAND CEMENT”.

Production Technology:

The factory has four grinding units having installed production capacity of 3120 metric tons a day. Two of the grinders are 3m diameter X 9m length (production capacity 30 TPH per unit) while two others are 3m diameter X 11m length (production capacity 35 TPH per unit). Each of the grinding units is equipped with highly efficient separator to screen out the unwanted particles.

Quality Assurance:

The quality assurance department collects samples from different areas of the mills each hour of the production cycle and feeds the production department back on its findings derived from the laboratory tests and analysis, and curative measures are determined accordingly.

Production and Packaging:

The factory has four silos for bulking the finished products. Installed capacity of two silos is 3500 metric tons each while the same of two others are 5000 metric tons each. Cement goes to packing plant from the silos upon an integrated system comprised of roots blower, inlet box, pneumatic shut-off valve and flow-control valve. Two roto-packers – Haver & Boecker – of German origin and output capacity of 100 metric tons/hour and 120 metric tons/hour make the products ready for the consumers with electronically-done weight confirmation.

Paper-sack, produced and supplied from a sister concern, is usually used as the basic packing material. Poly-sack is also used depending on the consumers' demand.

Bashundhara Paper Mills Ltd.

An Enterprise of Bashundhara Group

Bashundhara Paper Mills Limited (BPML) and Bashundhara Multi Paper Industries Limited (BMPIL) are two distinct industrial entities, have been guided by a common mission statement:

"We Are Passionate about Helping The World Excel In Education, Communication, Business & Salutariness By Offering Eco-sustainable Paper-based Solutions."

The two entities stand out from others with their untainted six values – **Supportive, Passionate, Integrity, Responsible, Ingenuity and Togetherness** – that ultimately bring out the SPIRIT within.

BPML has got three industrial units, while BMPIL has got its only unit – all are equipped with the industry-best state-of-the-art facilities and are regularly going through meticulously opted refurbishment processes to cope with achieving “scale of economies” and “resource conservation” especially in energy (power consumption) and water usage per unit output. These significant alterations have been easily accomplished backed by dependable partnerships with world’s top technology providers e.g. Valmet, Andritz, ABB, Siemens, Voith, Caterpillar, Gapcon, Cleaverbrooks, Thermex, Sigma Engineering, Recard, Parker, Eurotherm, OK Machineries, Adpep, Taisan, Omet, ZWC etc.

Having positioned in a fast-growing market set, Bashundhara has been relentless over two decades to offer its diversified products ranging from different types of paper, tissue and hygiene portfolio. Thus it has attained trust from customers at home and abroad. At present, Bashundhara Paper is the only trusted source of volume Paper-needs of Bangladesh government, while keeping pace of exporting to over 25 different global destinations. Noteworthy, it has succeeded to become the only company in Bangladesh with certification of ISO 9001:2015

and FSC-CoC at the same time, certainly due to its thrust on environment, which is visible in various eco-friendly initiatives at the plant sites.

Bashundhara Paper Mills Limited (Unit-1) was commissioned in 1993 with an integrated paper plant having 36,000 MTA installed capacity and commenced commercial production in February, 1997 to cater to the rapidly growing local demand for paper and paper products. Over the years, the production capacity has been enhanced with the addition of 3 more paper machines and 10 conversion units.

This unit manufactures a diversified product range from 20 GSM to 110 GSM of different grades of White Writing and Printing Paper, Carbonless Paper (NCR), Colored/Offset Printing and Wrapping Paper, Color Ledger Paper, Sticker Paper, Cigarette Paper, OGR Paper, Exercise Books, A4 Paper, Paper Sack etc. The company was the pioneer to introduce locally-made offset paper in the market.

Periodic renovation and modernization of the plant machinery overseen by the plant experts and engineers from home and abroad have helped the plant remain healthy for taking up targeted production volume even after decades.

The company's firm commitment to consumers and success in delivering high quality products and services to customers are the major reasons behind the attainment and retainment of the leadership position in Bangladeshi paper industry.

Furthermore, in a bid to retain the leadership, a turn-key agreement has been signed with Andritz AG, Austria to set up the most sophisticated tissue paper production line, having 120 metric tons per day production capacity. It will come into operation by the 1st half of 2018.

YEAR OF INCEPTION:

UNIT ONE: 1993

UNIT TWO: 1994

UNIT THREE: 1995

LOCATION: MEGHNAGHAT,
SONARGAON, NARAYANGONJ.

PRODUCT: ALL TYPES OF PAPER

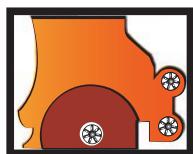

Bashundhara Paper Mills Ltd. (Unit-2), formerly known as the Bashundhara Newsprint & Duplex Board Industries Ltd., was set up in 1994 as the 3rd paper manufacturing enterprise of the Group.

The plant is comprised of three production lines for manufacturing Newsprint Rolls, White Writing and Printing Paper, Duplex Board, Liner Paper, Kraft Paper, Art Card, Art Paper and allied products. Precision runs through conservation of materials in this plant that has led to a 125 metric tons per day Sludge-Board production unit.

Bashundhara Paper Mills Ltd. (Unit-3) was set up at Anarpura, Gazaria, Munshiganj in 1995. This first basic tissue paper manufacturing facility in Bangladesh later emerged as the pioneer in the trade against the backdrop of rising demand for tissue products. Thanks to changing lifestyle of urban to suburban consumers, Bashundhara Tissue has become a trusted name with solid brand equity.

At BPML-3 unit, commitment to quality and customer satisfaction is reflected in understanding and fulfillment of expectations of the consumers, big or small. This, in turn, has become a key factor in its growth and the advantage that the company has been able to secure over the years in terms of a wide and loyal distribution network throughout Bangladesh.

In five production lines, dozens of tissue products are being manufactured to cater to consumers' demands for diverse types of tissues ranging from Facial Tissue to Pocket Tissue, from Napkin Tissue to Kitchen Towel Tissue, from Toilet Rolls to Clinical Bed Sheets and from Wet Tissue to MG Hard Tissue. Not only pure tissue products, but also different hygiene to other paper items e.g. Monalisa Sanitary Napkin, Bashundhara Baby Diaper, Bashundhara Diapant, Hand Gloves, Cotton Bud, Drinking Straw, Tooth Pick, Paper Carton Container, MG Poster Paper, Ledger Print Paper, Colour Printing Paper (Pink, Yellow, Green, Blue), Liner Paper, Manifold Paper (White, Pink, Yellow, Green, Blue), Plug-wrap Paper are among the premier products of this plant.

MUNSHIGONJ

PRODUCT: VARIETY OF PAPER &
TISSUE PRODUCTS

Bashundhara Multi-Paper Industries Limited (BMPIL), the latest and fourth venture of paper manufacturing, started commercial operation in July 1995, with specific target to meet the fast-growing demand in domestic and international markets.

With two paper machines having 2.1 million MTA combined capacity, the BMPIL project is supplemented by a set of six integrated gas-turbine power plants of 24.5MW capacity. Two separate units producing Wet-Ground Calcium Carbonate (WGCC) and Precipitated Calcium Carbonate (PCC) are in operation to ensure uninterrupted and top-quality production.

The prestigious and best-selling brand 'Bashundhara A4 Paper' and White Printing Paper (bulk) are being produced at BMPIL using almost half of the total installed capacity, while the rest of the capacity is comprised of producing Coated Paper and Light-Weight Coated Paper.

A Mosquito Coil Plant of two production Lines with capacity of 600 thousand pairs a day at each line under BMPIL is

in the process to start commercial production soon.

Run by a group of sturdy technical and highly experienced paper professionals of the country since its inception, all the production units of BPMIL & BMPIL are absolutely environment-friendly through the leverage of most-modern Effluent Treatment Plants (ETPs). The company runs through unique ERP solution (SAP), a transformational technology, which brings together best practices across all functions of the organization to deliver highest value to all external and internal stakeholders. The company continues to conduct regular audits for its quality standards and customer satisfaction through research conducted in-house and also by independent agencies. The practice helps the company remain updated with changing customer preferences and develop its products to stay well ahead of the curve.

These pioneering moves have given Bashundhara Paper a pride of being the change leader, ushering in a phase of complete makeover in the Bangladeshi paper market.

BASHUNDHARA LP GAS LIMITED

Bashundhara LP Gas Limited is the first private Liquid Petroleum Gas bottling and marketing company in Bangladesh. It started operation at the Mongla Port Industrial Area in 1999.

The company has succeeded to secure larger share of the domestic market of the LP gas by pushing the public entity – Bangladesh Petroleum Corporation (BPC) out of the race.

Sufficient production of filled bottles against the demand and well-planned distribution network all over the country helped the company become the best of its kind for successive years. Variety of gas bottles – 12 kg, 30 kg and 45 kg – of red and yellow colors are currently going to the users with the brand name of "Bashundhara LP Gas".

The bottling plant has a moderately large jetty for LP gas carrying vessels and is supported by six spherical tank terminals of 500 metric ton storage capacity each and a 2000 metric ton tank terminal – 5000 metric tons in total – and two sets of 24-point carousal system filling posts. The facility is capable of filling as many as 2000 bottles an hour.

Besides production for the domestic, commercial and small industrial users, the company supplies bulk form to other LP gas bottling and marketing companies. It has a moderately large fleet of bulk gas carriers and filled-bottle distribution vehicles.

The company under its continuous expansion schemes has already set up two satellite bottle-refilling plants at Sitakunda in Chittagong and at northern district of Bogra. Setting up of two more plants – one in the capital city and the other at Barisal -- is on the progress.

In the latest development the company has set up countries biggest LP gas cylinder refilling plant with a storage capacity of 4000 metric tons and 3000 pieces of cylinder refilling plant. This will be one of the iconic plans not only in Bangladesh but also in the world i.e. second largest of its kind in South East Asia. European latest technology "Flex-Speed" will give the enormous leverage to provide best service to the customer for Swift product supply. It is going to be setup at Basundhara Special Economic Zone at Keraniganj. One imported and two locally built LPG carrying vessel would be supplying bulk from Mongla to Dhaka. It will surely set the new horizon in LPG industry.

Chittagong satellite plant went into operation in January, 2014 with total storage facility of 70 metric tons and refilling capacity of 220 bottles an hour while Bogra plant was made operational in November, 2014 with storage facility of 90 metric tons and refilling capacity of 220 bottles an hour. Two more satellite filling stations at Barisal and Sylhet are currently in the pipeline.

An autogas refilling station for the vehicles converted to LP gas has been set up at southwestern district of Jessore in 2013. Total storage capacity of the refilling station is 13 metric tons. Similar refilling stations will also be set up at Barisal, Dhaka, Khulna, Rangpur and Chittagong in the near future.

BASHUNDHARA CITY DEVELOPMENT LIMITED

Country's first integrated megamall – Bashundhara City – has already become an icon of the metropolis with growing number of visitors and subsequent flocking of retailing outlets of the top global brands at this tower-complex. Bashundhara City Development Limited is the parent company that owns the facility. It was adjudged as 12th of its kind in the world and one of the largest shopping malls in South Asia. The complex was given prestigious 'Super Brand Award' in recognition of its general excellence in the very year of its inception in 2009.

With a 19-level finely-crafted structure of innovative architectural design and supported by best functional interior lineups, the tower boats a total floor area is 191,200 square feet which is currently being used for 2325 retailing outlets, megastores, business centers and offices.

Consumer brands of local and international repute like Hewlett Packard (HP), Apple, Hush Puppies, Nokia, Samsung, Unilever, Bata, Toggi World, Ecstasy, Apex, Yellow, Menz Club, Rangs, Arong and Kebab chain Baba Rafi have already set up their outlets at the mall.

Several new-generation private commercial banks have set up either full-fledged branches or the Automated Teller Machine and Automated Deposit Machine at the facility. Singaporean leading chain store – Mustafa Mart – has been running a branch at the complex

since 2012. Many other known brands are in the process of securing their presence at the megamall.

Apart from internationally certified safety, security and car parking arrangements, the shopping facility is supported by all the modern-age amenities like Theme Park, Movie Theater, Bowling-Cart, Billiard & Pool Boards, Video Games, Kids' Zone, Fitness Center, Swimming Pool, Spa-Apothecary, Food Court and Global-Cuisine restaurants.

Over 60 thousand visits usually take place daily at the facility while the number of visitors nearly doubles during holidays and at the weekends. It turns a 'must-go' place during special occasions and major festivals like the Eid, Puja and Christmas when crowds go as big as 200 thousand a day.

It came under the focus of the local and international mainstream mass media when its popularity started soaring fast among the native and the expatriate visitors. Some of the inspiring newspaper headlines were:

The New York Times – 'Now, a megamall for Bangladesh'

The Herald Tribune – In Bangladesh, an epic sign of changing fortunes'

The Bangladesh Observer – 'Bashundhara City, Shopping experience of next millennium'

The New Nation – 'Bashundhara City: Opens new horizon for socioeconomic development'

BASHUNDHARA INDUSTRIAL COMPLEX LTD.

ADVANCED TECHNOLOGY
STRONGEST BOND

VRM

Bashundhara Cement is the premier product of Bashundhara Industrial Complex Limited (BICL), which was established inside the Industrial Zone of Mongla Port and at Madanganj of Narayanganj district at the same time in 2012.

Equipped with the most modern technology in cement manufacturing – Vertical Rotation Milling (VRM) – the plants were taken up to cater to the ever-growing demand for higher-quality cement in the country targeting several large-scale development projects in the public sector.

The collective annual production capacity of the plants is nearly 3.4 million metric tons. Capacity of the plant in Mongla is 1.2 million and the plant in Madanganj is 2.2 million metric tons. Portland Composite Cement, Blast-furnace Slag Cement and Ordinary Portland Cement are among the mainline products of the plants.

It is believed that the brand will soon become the market leader because of its quality, competitive price, faster distribution and relevant technical supports to the consumers apart from expansion of markets in Chittagong and Sylhet divisions.

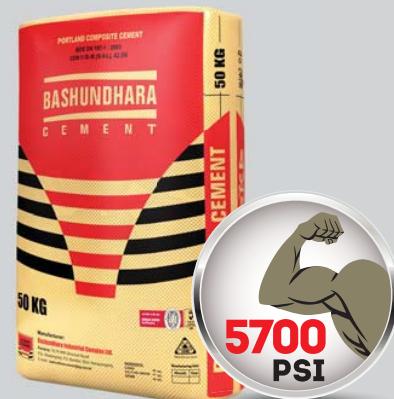

Several large-scale development infrastructure projects now under implementation in the public sector have already started receiving bulk supply of Bashundhara Cement while the upcoming ones are in the process of securing adequate supply of the cement from the company. Such use in mega government projects manifests the recognition of the brand and the product quality.

Steel & Engineering Ltd.

Bashundhara Steel & Engineering Limited, an enterprise of the Bashundhara Group, came into being in 2002 against the backdrop of the country's economic growth and ascending demand for medium-size multipurpose marine vessels at home and in the international markets.

An integrated and modern facility for marine shipbuilding was subsequently developed at Katuail of Keraniganj on the bank of the river Buriganga. It became an ISO 9001:2008 certified company shortly after its inception. Later it acquired recognition of the Mercantile Marine Department (MMD) in Chittagong for docking and technical maintenance of vessels.

It has ample space at the yard for taking up construction of as many as 10 vessels at a time, most modern devices for handling vessels of any kind, several slipways for letting 'ready-for-sail' vessels in the water, a dry-dock, a large and equipped workshop, a metal-casting foundry and a group of smart, experienced engineers and technicians.

Hundreds of inland water vessels, moderate-to-large dredging-equipment and bay-crossing lighters have so far been given docking and techno-physical maintenance services from the facility. It has become successful in business generation mainly thanks to its professional excellence and qualitative services. Many corporate houses in the country like the Partex Group, TK Group, City Group, Abul Khair Group, Crown Cement and Khan Jahan Ali are on the regular client list.

Two modern dredging-equipment built at the shipyard were exported to a Nigerian company couple of years ago. Besides the repair and maintenance works, a total of eight oil tankers of Bureau Veritas class of minimum 4200 metric ton-capacity will be built in near future.

The entity is currently on the way to build even larger and ocean-cruising vessels for the local and overseas clients and thus to clinch the crown of best shipyard in the country in the years to come.

Bashundhara Logistics Ltd.

Bashundhara Logistics Limited started its journey under the umbrella of the cluster – the Bashundhara Group – in December 2004 with the intention of changing the traditional perception in the country's logistic service industries.

Logistic infrastructure of the company is supported by a moderately big fleet of carriages of major and popular (marine and road) modes and types having different loading capacities, tools and apparatus of the modern age and a skilled, experienced and dependable workforce.

The company has introduced integrated and customized service delivery system by shouldering the entire responsibilities of raw materials sourcing from anywhere of the world, their transportation to the point of consumption and efficient supply chain management for medium to large-scale industrial entities and the mega manufacturing units.

It has post-production support line-ups as well for distribution of finished products and bulk commodities, apart from pre-marketing assistance services, expert consultations on market penetration, analysis, evaluation and determination of way out from critical situations.

INTERNATIONAL CONVENTION CITY BASHUNDHARA

International Convention City Bashundhara (ICCB) is the only integrated and mega facility in the country that was built with a view to redefine the scope and standard of domestic service industry. It came into operation on January 1, 2015.

Away from the hullabaloo of the metropolis, yet strategically located and conveniently connected, the Convention City is perfect option for sociocultural, corporate, educational, commercial, national and international events of any type.

Having more than 650 thousand square feet of covered space within its four beautifully designed halls supported by ample open space for purposeful usage, the facility is equipped to host big crowd events for up to 20 thousand guests at a time.

Absolutely secured and organized parking facility, end-to-end vigilance, well-groomed staffers, well exposure and a gamut of international-standard amenities have already made it a premier place for events of national and international importance.

Besides mega events, there are provisions for relatively small or medium-scale events like Mehedi Party, Birthday Party, Celebration of Anniversary, Wedding Engagement, Annual Conference and Family Get-Together.

Amenities that have made it distinct are:

Helipad: Like many international venues around the world, the ICCB has a designated helipad.

Car Parking: Secured and organized parking lot is ready to welcome more than 2000 cars.

Instant Internet Access: Entire complex is under the WiFi coverage of excellent signal strength.

Shuttle Bus: Customized shuttle services are ready by luxury air-conditioned buses.

Vigilance: The ICCB is always under manual and electronic vigilance against predictable hazards.

Seminar Hall: It is suitable for events of any size and type, which deserve exposure and longer mileage.

Trained Staff: Kitchen staff work under the care of best chefs for best catering services.

BASHUNDHARA OIL AND GAS COMPANY LIMITED

Bashundhara Oil and Gas Company Limited (BOGCL), a concern of the Bashundhara Group, was formed in 2006. The company has been working for narrowing the existing demand-supply gap of petroleum and petrochemical products in the country and to open the potential avenues for faster growth.

As the first step of materializing the vision of BOGCL, initiatives have already been taken to set up the 'Bashundhara Bitumen/Asphalt Production Plant' at Keraniganj, Dhaka. Construction of the plant is in progress. Technology with proven efficiency is being used at the plant for producing bitumen of different grades including the premium ones.

The thrust-sector project of the company, Bashundhara Petrochemical-Refinery Complex, will soon be built at Sitakunda in Chittagong. The first unit of this complex – Bashundhara Refinery – will be the largest refinery in the country having ample capacity of catering to the country's total demand for petroleum products.

Equiped with state-of-the-art technology procured from globally renowned companies, the facility will be producing high-end finished products like Aviation Fuel (Jet-1), Gasoline of premium grades, High Speed Diesel (HSD), Liquid Petroleum Gas (LPG) and Bunker for the marine fleet.

The second unit of the complex – BOGCL Olefins Plant – will address the fast-growing demand in petrochemical market in Bangladesh. The unit will be manufacturing variety of olefins and polymer products targeting the domestic and international markets.

Future projects of the BOGCL include Lube Base Oil Production and Lubricants Plant mainly targeting the demand for lubricants in industrial, automobile and marine sectors.

Bashundhara Shipping Ltd.

Bashundhara Shipping Limited commenced its operation in 2009 initially with a view to ensuring faster, uninterrupted and hassle-free transportation of large quantity of industrial raw materials for the industrial and manufacturing units belong to the premier business cluster – the Bashundhara Group.

It started operation with three ocean-going bulk vessels – 'MV Bashundhara-1', 'MV Bashundhara-2' and 'MV Bashundhara-3' of around 47, 47 and 37 thousand metric tons capacity respectively. A total of six bulk vessels of different deadweight tonnage are currently in operation.

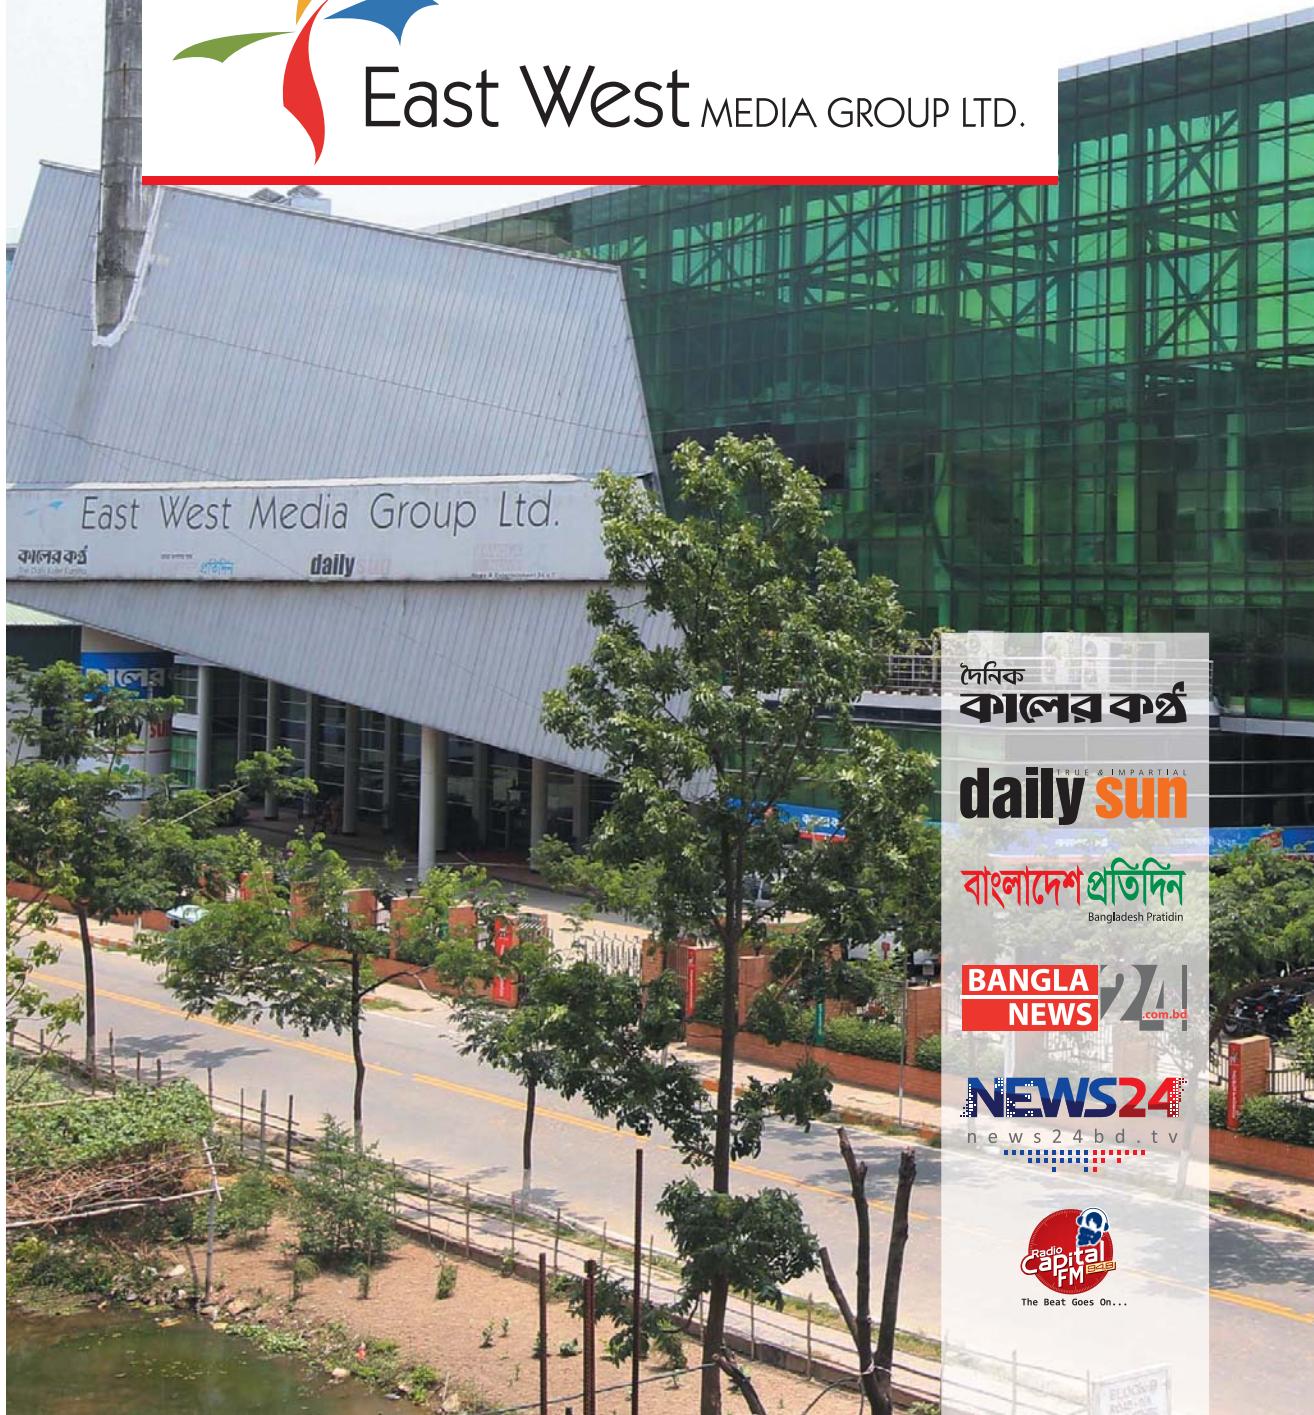

As the fleet size went bigger within a short span of time, the company started full-fledged maritime transportation business and subsequently become successful.

The initial, which were in the fleet initially, were sent out of operation on vessel-health grounds and immediately replaced by three new vessels of higher deadweight tonnage. Procurement process of tankers for petroleum products, liquid petroleum gas and bitumen is in progress.

East West Media Group Limited (EWMGL), the largest mass media house in the country, is a subsidiary of the Bashundhara Group. It came into operation in 2009 with the core intention of addressing public demand for objective (true and impartial) information and entertainment.

Prestigious Bangla daily 'The Kaler Kantha' is the first and very successful initiative of the house. It has clinched the second position among the country's new-generation most credible mainstream newspapers.

The country's largest Bangla newspaper in terms of circulation, 'The Bangladesh Pratidin' has also come from this house. More than half a million readers are now being served with the printed copies every day. Initiatives are under way to enhance the number of printed copies of the newspaper to a million in the years to come.

Besides two Bangla dailies, an English newspaper "Daily Sun", a bilingual online news portal "banglanews24.com", a non-stop news television channel "News24", a FM (Frequency Modulation) radio station "Radio Capital 94.8 FM" and a state-of-the-art newspaper printing facility are currently in operation under the media house.

The daily Sun has reached all segments of English newspaper readers and earned repute by innovative content planning and offering unbiased and objective information. It is now the second largest English daily among the mainstream national newspapers in terms of circulation.

Apart from the printed copies, all these newspapers go online in the form of 'electronic newspaper' for the global readership. The bilingual news portal "banglanews24.com" has already become the best online news portal in the country with a record number of visitors a day.

'News24' is a news-based nonstop satellite television channel and the fifth venture of East West Media Group Limited. The project was planned to make a difference in the traditional pattern of audiovisual feeds of news and views to the viewers in general.

The Beat Goes On...

The TV channel started formal streaming on the air on July 28, 2016 after license was acquired on March 25, 2015. The television channel has already become successful in making a vibrant presence among the viewers at home and abroad by its objective and in-depth news coverage alongside the news analysis and meaningful presentation of people's reactions and expert views on events of public interests.

Supported by a pretty large group of smart and young news crew, technical team, creative planners, most modern & artificially intelligent devices and tools, the television channel is believed to become one of the leading of its kind in the country soon.

Radio Capital is the newest unit of the media house. The infotainment-radio-station started formal transmission with the slogan 'The Beat Goes On' in January, 2017.

It goes on the air from the tallest transmission tower ever raised from the ground in the country's private sector broadcasting history with 94.8 MHz radio-signal spectrum on the FM band. It has been airing different programs round-the-clock produced mainly in the light of the country's rich cultural heritage and demand from the progressive listeners of this time.

Audience within 30-kilometer radius of the tower is currently under the radio station's signal coverage. Besides radio transmission, live streaming is also done at the cyber domain and Apps-run digital handy devices. Under the leadership of an advanced technical team, creative producers and performers, the radio station has managed to make a heart-blown presence among the listeners. Moves for setting up 10 more relay-stations are under way to expand the coverage nationwide in the years ahead.

Bashundhara Food & Beverage Industries Ltd.

The Home of Nutrition

Bashundhara Food and Beverage Industries Limited (BFBIL) started its journey at Pangaon area of Keraniganj in 2009 in the context of fast-growing demand for food and beverage items in the country, especially under the influence of overall demographic and socioeconomic changes.

It is the largest facility of its kind not only in the country but also in South Asia. The plant is comprised of state-of-art European-origin flour mills of the production capacity of 1000 metric tons a day, a dozen of ultra-modern thermal silos of total capacity of 120000 metric tons and a world-class food testing laboratory. With the enormous success of the 1st unit, BFBIL is on the way to operate its 2nd flour mill unit with a capacity of 1250 metric tons per day from mid of the year 2018.

The company has successfully penetrated the markets of fast-moving consumer goods (FMCG) in the country. The superior quality of its finished products, compliance of international health standards and food-grade & eco-friendly packaging facility has placed entity as the holder of lion market share

Procurement of best quality grains, random check at all stages of the production process, laboratory analysis and subsequent and instant remedial arrangements are usually taken up for quality assurance of the products. Australia, Canada and European companies are among the grain suppliers network. The connectivity has played catalytic roles in formulation of business generation strategy of the entity letting it become the number one food, beverage and other consumer product brand.

Segment-targeted consumer brands like 'Bashundhara', 'Kings Crown' and 'Century' have already been launched mainly for Atta, Maida and Suji. With

different taste and flavor Bashundhara Instant Noodles already introduced with Curry, Masala, Hot & Spicy and Bar-b-q flavor with the SKU of single pack, 4-pack & 8-pack. Moreover, to commensurate with the dynamic taste of consumers, Bashundhara Stick Noodles was also launched in 3 exciting flavors Egg, Masala and Curry in two different sizes, 180gm & 300gm. Regular Pasta and Instant Pasta are also waiting in the pipeline to be launched in early 2018 in 200 gm, 300 gm & 65 gm pack. In addition, BFBIL is going to launch two types of chips brand like Poppers in Coconut Vanilla and Spicy Cheese flavor & Crackers with Masala, Chili Chatka, Hot & Sour, and Pickle Flavor. World class production facilities are under development for many more other food and beverage products.

Bashundhara Multi Food Products Limited is the recent addition to the industrial entities with a capacity of 1000 metric tons of Crude Soyabean oil and 1000 metric tons of Crude Palm oil refinery under the umbrella of the group. The unit has been built at Pangaon of South Keraniganj and is expected to start commercial production in the first quarter of 2018.

Considering the enormous demand Bashundhara Multi Food Products Limited is going to introduce Bashundhara Fortified Soyabean Oil in different pack sizes such as half liter, 1 liter, 2 liter, 5 liter and 8 liter for retail consumer. We will also come up with Refine Super Palm Oil in bulk pack sizes in 16 kg tin and 186 kg drum for commercial market.

The facility will focus on production of edible oil, vegetable ghee and products of allied nature by refining bulk crudes of major oil seeds. Construction and commissioning of the plant and relevant machineries are in progress.

BASHUNDHARA
INFRASTRUCTURE DEVELOPMENT LTD.

Bashundhara Dredging Company Limited (BDCL) was set up in 2010 with the core objectives of helping the nation retrieve its old heritage of river transportation and the country's economy thrive by making all major rivers of the land navigable round-the-year. The entity has been renamed Bashundhara Infrastructure Development Limited in March 2017.

Within only seven years of its operation, Bashundhara Infrastructure Development Limited has garnered higher reputation as one of the most sophisticated dredging companies in the country. The company has been delivering services with higher quality and optimum onboard safety coupled with efficient business management and resources utilization. It already has acquired the ISO 14001:2004 certification.

Two more North American shark-class medium-diameter dredgers will soon join the fleet of the company. Addition of the new dredging units to the existing fleet will not only enhance the dredging capacity of the entity but also help it become capable of dealing with variety of underwater dredging purposes.

Several major dredging projects mainly in the public sector have already been delivered successfully while some of the projects under the care of the company are in progress.

Successfully completed public projects are:

1. Dredging work by cutter suction dredger for improvement navigability of Sadarghat-Berulia/Ashulia river route in the river Turag.
2. Dredging work by cutter suction dredger for maintaining navigability of Mawa-Manglamajhi Kathatbari-Charjanajat ferry & river route in the river Padma.
3. Dredging work by cutter suction dredger for improving navigability of Barisal-Jhalakathi-Barguna-Patharghata river route.
4. Dredging work by cutter suction dredger including dredging-related works for developing navigability of Mongla-Ghasiakhali canal.

Successfully completed private projects are:

Land filling at Bashundhara Industrial Complex Limited, Anwara, Chittagong.
Channel Dredging at Bashundhara Food & Beverage Limited Jetty, Keranigonj, Dhaka.
Channel Dredging at Bashundhara Industrial Complex Limited Jetty, Modonganj, Dhaka

Ongoing projects are:

1. Dredging work by cutter suction dredger for maintaining navigability of Hazrapur-Jabra river route in Dhaleshwari and Kaliganga

Upcoming projects are:

1. Sitakund Industrial Park Development
2. Mirsarai Economic Zone Development

Sundarban Industrial Complex Ltd.

Sundarban Industrial Complex Limited was set up on 12 acres of land at the Mongla Port Industrial Area in 2011. The project was planned with a view to producing international-standard cylinders especially for containing liquid petroleum gas (LPG) used by households, small-scale industrial and commercial entities and gas-driven automobiles.

The plant has already acquired ISO 9001:2008 and ISO 14001:2004 certification. Cylinders made at this plant are compliant with Users' Safety and Environment-Friendly Design Code DOT 4BA 240. For safety assurance of the gas bottles, the plant has Burst, Tensile, Chemical Composition tests equipment and X-ray Inspection facility.

Production lines of the plant are comprised of modern tools and devices like Auto-Hydraulic Press, Pneumatic Machines, Auto-MIG Welding Machines, Sub-merged Arc-Welding Machines, Deep-Drawing Stretching Machines, Auto-Electric Anneal Furnace, Automatic Pressure and Leakage Checking Machines, Zinc Spray & Power Coating Paint Lines and a heating chamber.

Main raw material of this plant is Hot Roll Coil (HR Coil), which is usually imported from internationally reputed producer and suppliers in Japan and South Korea.

The plant is capable of producing 140 bottles of 12.5 kg capacity per hour. Besides the very common and popular size of 12.5 kg, gas bottles of other sizes and designs – 30 kg, 45 kg and 60 kg capacities – are also made at this plant.

It is also supplying gas bottles of different sizes and designs to the domestic LPG retailing and marketing companies after meeting the demand of its sister concern – Bashundhara LP Gas Limited.

Manufacturing of international-standard Petroleum Gas Stoves is currently under active consideration of the plant management.

In the latest development, the company has set up a new plant for making bottles of all three categories – 12kg, 30 kg and 45 kg – with production capacity of 220 bottles an hour at at Bashundhara Special Economic Zone at Keraniganj.

BASHUNDHARA INDUSTRIAL ECONOMIC ZONES

at Mirsarai

FE Report

The government will provide 500 acres of land to Bashundhara Group for setting up an industrial economic zone (EZ) at Mirsarai in Chittagong.

Under the move, the Bangladesh Economic Zones Authority (BEZA) and Bashundhara Group (BG) signed a memorandum of understanding (MoU) on the handing over of Bashundhara Industrial Economic Zone.

Executive Chairman of BEZA and Chairman of BG Ahmed Akbar Sobhan Mol at a city hotel on behalf of their respective organisations.

Bashundhara Group is in the process of setting up three Economic Zones, the first in the history of country's private sector initiatives, aimed at facilitating the ongoing industrialization process.

Two of the economic zones are to be developed on the river Buriganga at Keraniganj in Dhaka named Basundhara Special Economic zone and East West special Economic zone. One is to be developed at Mirsarai in Chittagong. And many others are thought and planned to be developed like 'Sitakund Industrial Park' in Sitakund.

After starting operations, the company will invest additional \$ 40 billion by 2020 to help earn additional \$ 40 billion by 2020.

The BEZA has already issued primary clearance to private organisations for developing different parts of the country.

Bangladesh Economic Zones Authority (BEZA) has already passed primary clearance in favor of the projects undertaken and the initial infrastructure development planning of the economic zones is in progress. The projects will be supported by multimodal transportation and the utilities of all forms.

BASHUNDHARA FOUNDATION

Bashundhara Foundation is a 'not-for-profit' and social development platform of the business group. It was formed in 2005. The foundation runs on the generous contribution of the business group. Ultimate welfare of the humanity is the core objective of the entity.

Though it is committed to overall welfare of the people, letting poor and helpless people find suitable way out from the extreme poverty and become self-reliant is always top on its agenda.

The foundation has, therefore, initiated a unique approach of micro-lending where borrowers feel the comfort of repaying the money in mutually agreed tenure and suitable numbers of installments and obviously without interest and service charge of any kind.

More than 15 thousand families at 80 villages under 13 unions of Bancharampur Upazila in Brahmanbaria district have so far become beneficiaries of the scheme making it a prime means of socioeconomic empowerment. The program is under constant expansion.

Apart from this, philanthropic activities of different forms are also being carried out under the coverage of the foundation. The activities range between distribution of blankets among cold-stricken people in different districts, distribution of relief materials among the distress and displaced people hit by natural calamities, medication grants to struggling-for-life patients and critically sick people, contributions to sight-saving initiatives, cosmetic surgery for cleft-lipped children, humanitarian supports to financially troubled intellectuals and distribution of stipends among the needy and brilliant students.

The Foundation also runs Afroza Begum Hospital, Ata Miah Free Friday Clinic at Manikganj and Bancharampur, occasional health and sight-saving camps at places, provides financial supports to different educational,

religious and social organizations like madrasa, mosque and orphanage.

Al-Hajj Abdus Sobhan Memorial, outdoor unit of the Ibrahim General Hospital, run by the Bangladesh Diabetic Association, has already been built on a piece of land inside the Bashundhara Residential Area that is donated by the authorities of the Bashundhara Group. The 'Bashundhara-Ad-Din Medical College Hospital' is an outcome of collaboration of two business giants – the Bashundhara Group and the Akiz Group. The hospital is located at Keraniganj.

Feeding elementary school students, orphans and the destitute is one of the routine programs of the foundation. Dozens of orphanages in and around the city are supplied with iftar and meals during the holy month of Ramadan. An elementary school and a Fazel madrasa in Bancharampur are supplied with mid-day meal. Similar programs are also taken up occasionally and round-the-year.

Distribution of cash in the form of Zakaat and clothing is also taken up once a year as the routine event. Hundreds of poor people benefit from it. The foundation finances hajj pilgrimage of more than one hundred pilgrims each year.

The foundation has made significant contributions to sports and cultural activities. Many domestic and international sports and cultural events have been given required patronization from the foundation.

With a view to producing trained human resources for the domestic and overseas job markets, the foundation is running a technical and vocational training institute where hundreds of students are pursuing diploma at token fees.

BTI Bashundhara Technical Institute

Bashundhara Technical Institute, a nonprofit job market-based hands-on training center, was established in 2010 with the objective of expediting the pace of the socioeconomic development process by providing demand-based technical education to the youths and letting them become fit for suitable employment and attain self-reliance by developing micro-enterprises. It operates under the care of Bashundhara Foundation.

Affiliation to the BTEB (Bangladesh Technical Education Board), the institute has all necessary facilities, experienced trainers and unique environment for innovative teaching and learning. The courses currently delivered at the institute are a) Basic Trade Course and b) Diploma in Engineering. Length of the Basic Trade Course is 3 to 6 months depending on the subject and the Diploma Course is 4 years.

Diploma in Engineering students are privileged to receive stipend from the World Bank under the Skill & Training Enhancement Project (STEP). Stipend recipients are selected on the basis of merit and the financial ability of the student. A half of the male and all the female students get Taka 800 a month during the course.

Formation of a center for teaching Korean Language at the institute is now under process. Successfully passed out students of this language center will qualify for jobs in South Korea. Total tuition fee waiver is available for son and daughters of Bashundhara Group employees.

Apart from that, internship opportunity at the industrial units of the Bashundhara Group and different merit-based scholarship or tuition waivers are also available for the deserving students and the graduates. The institute is apparently on the right way of its journey to make sacred mission of Bashundhara Foundation true. It is hoped that the BTI will become a leading technical institute in the country in the years ahead.

MICRO-CREDIT PROGRAM AS SOCIAL DEVELOPMENT

Life standard of ultra-poor people has started changing at the remote villages of Bancharampur Upazila under Brahmanbaria district when life-changing approaches and basic resources were taken within their reach on behalf of the Bashundhara Foundation back in 2005.

The foundation-run micro-credit program is the secret behind hundreds of life-changing and self-reliance success stories of the have-not groups in the remote villages.

The credit program is unique in many ways. It is free from collateral, service charge and interest of any kind apart from flexible repayment tenure, smaller and suitable payback installments and appropriate orientation on resource utilization.

Many families have already become self-reliant by utilizing the credit in dairy and poultry farming, cattle rearing, small businesses, grocery supplying, tailoring, quilt and comforter making and so on. Women of the disadvantaged groups are the target group of the program. People of other genders are also welcome and entertained at the credit program.

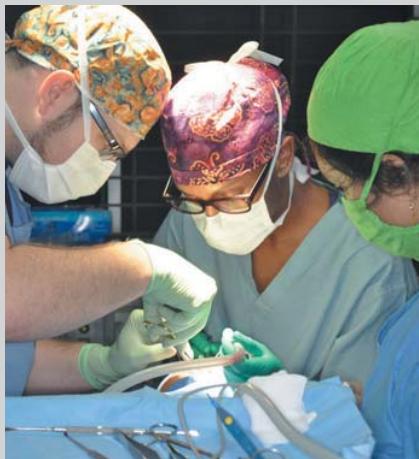

The initial revolving fund of the foundation was Taka 15.2 million. It is gradually getting increased with the generous support from the business group and the fast-growing demand from the beneficiaries. Hundred percent debt recovery is the general and visible testimony to its success.

Currently, the credit program is covering 15,000 beneficiaries at 80 villages of 13 unions under Bancharampur. Expansion of the program across the Upazila in the years ahead is under active consideration of the foundation authorities.

WOMEN STARTED SEEING RAY OF HOPE TO REBUILD THEIR LIVELIHOOD AND BECOME SELF-RELIANT WITH THE HELP OF INTEREST, SERVICE CHARGE-FREE LOAN

HOSPITAL & HEALTH CARE SERVICES

Life-saving medication and health services are also delivered to poor and marginal people under the corporate social responsibility (CSR) of the Bashundhara Group. Health services are usually delivered from satellite clinics and several partner hospitals in and around the city.

Bashundhara Ad-Din Medical College Hospital, Bashundhara Eye Hospital and Research Institute, Al-Hajj Abdus Sobhan Memorial, outdoor unit of the Ibrahim General Hospital, run by the Bangladesh Diabetic Association and Ata Miah Free-Friday Clinic are among the health services delivery centers.

ATA MIAH FREE FRIDAY CLINIC

The Ata Miah Free Friday Clinic was set up at Manikganj in 1999 with an objective of serving the poor, marginalized and helpless people in the area. Physician consultation and basic medicines delivered from this satellite center are absolutely free of charge.

Thousands of local people have benefited from the clinical consultation services and basic medicines delivered from the center over the years. On an average, 250 to 300 patients usually flock to this satellite clinic each week to seek health services.

AL-HAJJ ABDUS SOBHN MEMORIAL

It is the latest one among the health service delivery centers generously supported by the Bashundhara Group. The center is located inside the Bashundhara Residential Area. Bangladesh Diabetic Association (BDA) runs it as an outdoor unit of the Ibrahim General Hospital. Many diabetic patients live in the vicinity are the regular visitors of this center. Services from this center are delivered at token fees.

THE FOUNDATION ALSO RUNS AFROZA BEGUM HOSPITAL, FREE-FRIDAY CLINIC AT MANIKGANJ AND BANCHARAM-PUR, OCCASIONAL HEALTH AND SIGHT-SAVING CAMPS AT PLACES.

BASHUNDHARA AD-DIN MEDICAL COLLEGE HOSPITAL

It is an outcome of the collaborated efforts of two giant business houses – the Bashundhara Group and the Akij Group.

The entity came into operation in February, 2012. It is a unique combination of a center of excellence in medical education and a 250-bed hospital supported by all modern diagnostic and healing facilities.

The facilities have been developed at the River View Project of the East West Property Development (Private) Limited at Keraniganj beside the river Buriganga.

Mother company of the business giant, Bashundhara Group, has donated land and logistics for this institution.

Though initial focus of the entity was on pre-postnatal and pediatric services, it gradually has extended its services and incorporated many other departments and modern facilities for the patients from different strata of the society.

YEAR OF INCEPTION: 2012

LOCATION:
KERANIGANJ, DHAKA

বসুন্ধরা চক্ষু হাসপাতাল
(একটি অলাভজনক প্রতিষ্ঠান)
BASHUNDHARA EYE-HOSPITAL & RESEARCH INSTITUTE

Bashundhara Eye-Hospital & Research Institute was established at Sabrina Sobhan Road at Block-D of the Bashundhara Residential Area in 2014 with the core objective of providing qualitative ophthalmic medications mainly to the poor and marginal section of the society. Services delivered from this hospital are absolutely free of charges.

The institute is run by a group of renowned ophthalmologists of the country and equipped with modern devices of ophthalmic diagnosis, surgery and rehabilitation modules. Comprehensive treatment with FFA, ICG and OGT was introduced at this hospital for the first time in Bangladesh. Angle assessment of the glaucoma patients including laser treatment such as Green, YAG and SLT was also introduced for the first time at this hospital.

A 'zakat-fund' has also been created at the hospital to support the poor and helpless patients. A large number of patients have been given medications from this hospital since its inception.

BASHUNDHARA SPECIAL CHILDREN FOUNDATION

Bashundhara Special Children Foundation is a non-political, non-profit and non-communal charity foundation. It was formed in March, 2017.

The ultimate goal of the foundation is to help intellectually disabled students explore their potential abilities with integrated nurturing and developing approach. Each of the intellectually disabled students will benefit from interpersonal learning programs and become capable of joining the mainstream population.

Caring, supportive and homely environment is the specialty of the teaching approach.

Director of the Bashundhara Group Mrs. Yeasha Sobhan is the Chairperson of the Foundation. She was conferred "Begum Rokeya Shikha Padak" for her outstanding contribution for spreading education.

Three components are currently operating under the foundation -- 1) Administration Division, 2) School Division and 3) Therapy Division.

The Administration Division operates the Foundation. School Division contain six classes, these are:

- a) Preparatory (Mother and Children Group)
- b) Pre-primary (Children Group)
- c) Primary Boys (Special Education Class Boys)
- d) Primary Girls (Special Education Class Girls)
- e) Vocational Class Boys
- f) Vocational Class Girls

A total of 110 students are currently being provided with services free of charge. The services cover consultation and guidance of psychologists and efficient teachers. The foundation is also equipped with a rich Therapy Division. It also comprises of six departments.

They are:

- a) Physiotherapy Department
- b) Occupational Therapy Department
- c) Speech and Language Therapy Department
- d) Sports & Culture Department
- e) Music Department
- f) Dance Department

Opening of an individual "Autism Center" for the autistic children is under process of the Bashundhara Special Children Foundation.
